Dear resident

Re: 22 Sidney Road, London, SW9 0FE

I am writing in respect of some specific questions posed concerning 22 Sidney road by some residents.

Following a review of the as-built information for the block, we have summarised construction details below. This may aid valuers when considering the RICS guidance whether an EWS assessment is required.

22 Sidney Road

22 Sidney Road is a five storey building that is approximately 12.3m from ground level to the floor level of the top storey.

The building is a mixture of concrete and steel frame construction. The external wall finishes are a mixture of brickwork, render over blockwork and VMZinc cladding. Our understanding is this is single sheet zinc cladding and not a composite product. The insulation used in walls is Kingspan TW55.

The balconies are concrete construction with ceramic tiles as the floor finish and glazed balustrades.

Your sincerely

Suraj Shah
