Job Title: Electrician

Competitive Rates

### Electrician Job Purpose

Installs new electrical systems, including lighting and heating, to customer standards and to maintain those systems while upholding safety guidelines and complying with codes and regulations

### Electrician Job Duties

- Diagnose and repair electrical problems in commercial and domestic electrical systems, including fault-finding, rewiring, and monitoring
- Assess the parts needed for a job and place orders for those parts
- Conduct routine maintenance and testing on commercial and domestic electrical systems, and ensure installations are to manufacturer standards, including in fire alarms and security systems
- Rewire faulty electrical systems, such as lighting, heating systems, and alarms
- Ensure good quality workmanship which upholds company standards, complies with building codes, and follows safety requirements
- Work alone to find and present faults and concerns in electrical systems without receiving explicit direction
- Provide exceptional customer service and answer any customer questions
- Install electrical systems to 17th edition wiring regulations, including installing heating and cooling systems
- Provide professional assessments and advice for customers
- Possess working knowledge of Siemens Building Management Systems and Phillips lighting systems
- Possess working knowledge of IEE regulations, City & Guilds 2360 and 2382 qualifications, and inspection and testing certificate (2391)
- Demonstrate familiarity with NICEIC requirements
